

Check the label on your drone if it has this mark

Flying a Drone

Have fun | Be responsible for safety

DO

Make sure you are adequately insured

Check your drone before each flight

Always keep the drone in sighting distance

Keep your drone as far away as possible from other people, properties, vehicles and other aircraft

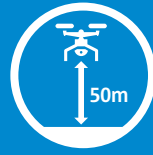

Comply with the limitations of the area, zone or airspace, defined by your National Authority

Operate your drone within the performance limitations defined in the instructions provided by the manufacturer

DO NOT

Do not fly higher than 50 m from the ground

Do not fly over large crowds or groups of people

Do not fly near aircraft

Do not fly in the proximity of airports, helipads, areas affecting public safety or where an emergency response effort is ongoing

Do not interfere with the privacy of other people and use your drone responsibly

Do not take photographs, videos or sound recordings of people without their permission

Do not fly over sensitive or protected sites (prisons, military bases, power plants, etc.)

Do not make changes to the drone

Check the label on your drone if it has this mark

Flying a Drone

Have fun | Be responsible for safety

- You need to be at least 14 years old or supervised by a person older than 14 years old
- You or your supervisor needs to be registered and pass an online test
- Display the registration mark on the drone and if equipped with e-identification, upload the registration information

DO

Make sure you are adequately insured

Plan your flight

Check your drone before each flight

Make sure your drone is equipped with up-to-date electronic identification and geofencing systems if mandated in the area you want to operate

Check the weather conditions

Familiarise yourself with the area where you will operate your drone and look at the location of people, property, vehicles, public roads, obstacles, critical infrastructures, and any other element that may pose a risk to fly your drone safely

Always keep the drone in sighting distance

Keep your drone as far away as possible from other people, properties, vehicles and other aircraft

Comply with the limitations of the area, zone or airspace, defined by your national authority

Operate your drone within the performance limitations defined in the instructions provided by the manufacturer

DO NOT

Do not fly higher than 120 m from the ground

Do not fly over large crowds or groups of people

Do not fly near aircraft

Do not fly in the proximity of airports, helipads, areas affecting public safety or where an emergency response effort is ongoing

Do not use the drone to transport dangerous goods
